

# Expressive

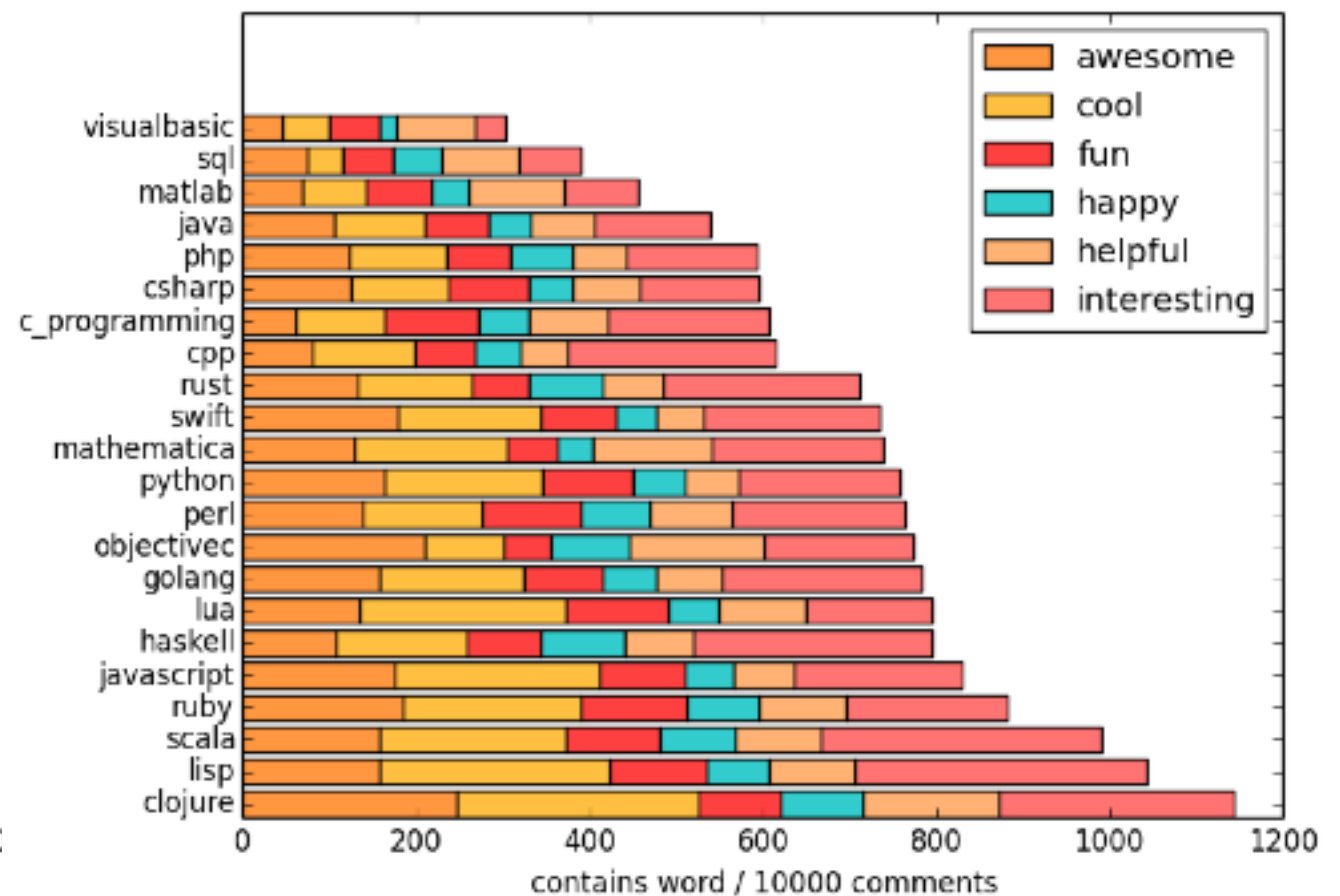

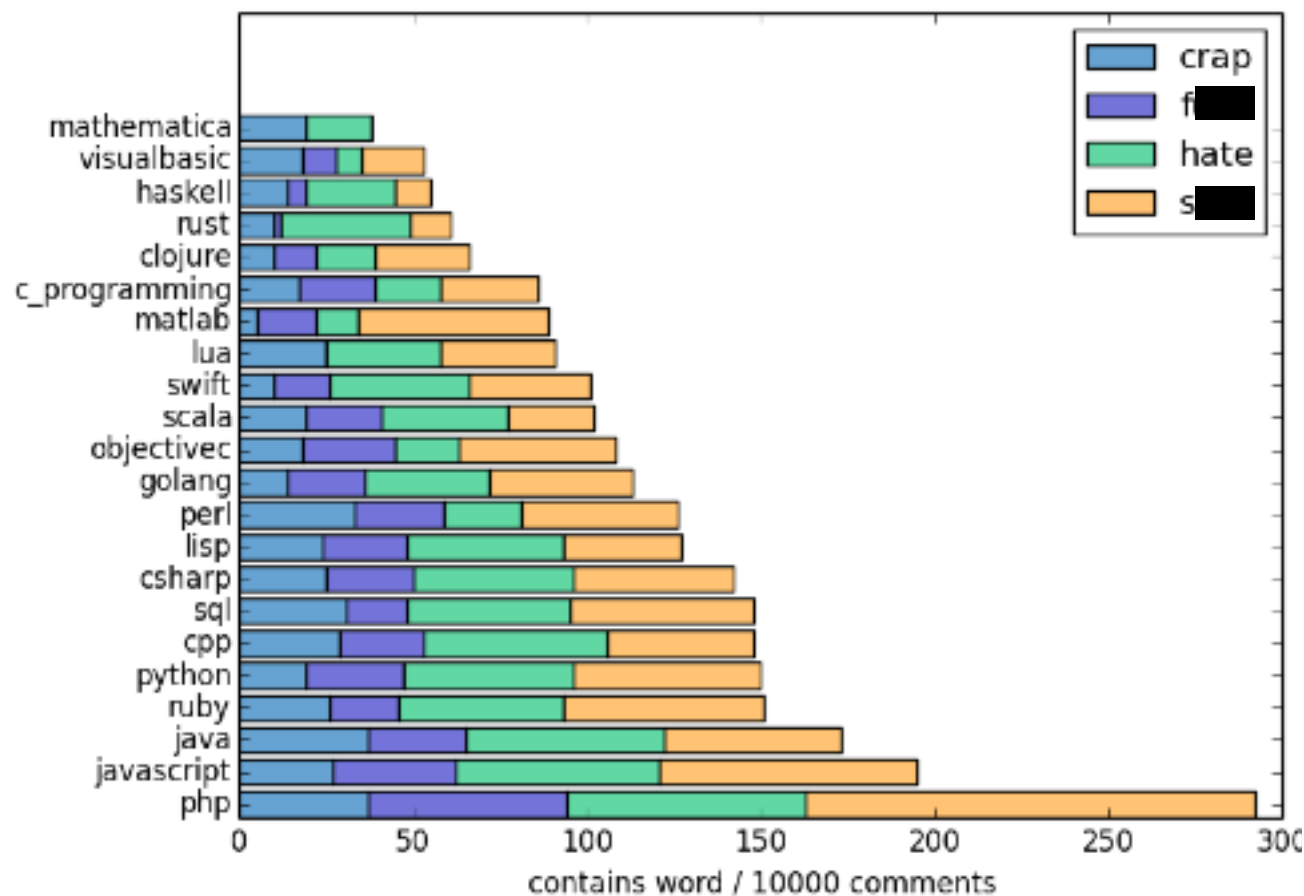

Combining those with our RedMonk [programming language rankings on popularity](http://redmonk.com/dberkholz/2013/03/25/programming-languages-ranked-by-expressiveness/), the only highly expressive, general-purpose languages within the top two popularity tiers are:

- Clojure
- CoffeeScript
- Haskell

If you're considering learning a new language, it would make a lot of sense to put **Clojure**, **CoffeeScript**, and **Haskell** on your list, based on expressiveness and current use in communities we've found to be predictive.

# Clojure developers are the happiest developers

A new analysis of Reddit comments shows which language's developers seem to be the happiest - and which are the most foul-mouthed
