Querying the Past

Get the db at a given instant

```clojure
;Girlfriend before the bite
(d/q
  gf-query
  (d/as-of (d/db conn) #inst "2000-01-01"))
```

```clojure
;Girlfriend before MJ
(d/q
  gf-query
  (d/as-of (d/db conn) #inst "2001-05-01"))
```

["Gwen Stacey"]

Querying the Past

```clojure
;Girlfriend before the bite
(d/q
  gf-query
  (d/as-of (d/db conn) #inst "2000-01-01"))

[]

;Girlfriend before MJ
(d/q
  gf-query
  (d/as-of (d/db conn) #inst "2001-05-01"))

["Gwen Stacey"]
```

Peter's Status

```clojure
;Examine the status times
(def status-query
  '[:find ?status ?time
    :where
    [?e :name "Peter Parker"]
    [?e :status ?status ?t true]
    [?t :db/txInstant ?time]])
```

- Determine the transaction that a new status was written

- Get the time of the transaction
