Hosted & Isomorphic

- Clojure: Java, JavaScript, and .NET

  - You get everything your host platform has

  - Works great for client/server apps

- Python: Native, JVM

- Ruby: Native, JVM

- Scala: Java, JavaScript, .NET, Native

- Kotlin: Java, JavaScript, .NET, Native

Simple

- Data-oriented

  - string, number, boolean, keyword, character, nil

  - (), {}, #{}, [] ;The basic collections

- (ℂ • • •) ;Calls are functions, special forms, or macros followed by arguments

- Simple doesn't necessarily mean easy

  - With the right resources, getting started is very fast
